- S3 HRO AN SRC

Weight (based on size 9):

- 750 grams

Sector Use:

- Agriculture
- Construction
- Engineering
- Maintenance
- Trades
- Utilities
- Warehouse & Logistics

Features & Benefits:

Like many good ideas the solution to providing Ankle Protection on a safety dealer style is a simple one: build the stretch area into the top part of the front of the boot to enable the ankle protection to be built in to the sides. However, that is only the beginning of the story. The real test is perfecting the boot upper design and components combination so that all the wearer convenience of a normal dealer boot design is not compromised. Getting that right has brought an impressive bonus: you would not believe how comfortable the bANG guardz dealer boot style is, nor its lace style stable mate. The EN/UKCA standard ankle protection (standard code: AN) built in to these styles provides the extra benefit of unsurpassed snug fit, comfort and support. The snug fit around the ankle area is a key area of focus by The Health and Safety Executive in respect of site work and BSH014 provides a perfect solution for those wearers that prefer to wear a safety dealer boot style instead of a lace boot.
