

MSA Personal Rescue Device RHZ Model with Harness

Latchways has revolutionised the rescue process with the development of the Latchways PRD® A lightweight, unobtrusive personal rescue device that is an integrated full body harness system for self-rescue contained in a small 'backpack' attached to a full body harness. The PRD is designed to be used in conjunction with a fall protection system or anchor point

- In the event of a fall the device lowers the person gently to the ground in a controlled descent
- Dramatically reduces rescue time
- 20m descent height
- Descent speed: 0.5-2m per second
- Up to 140kg worker capacity

Certified to the following:

- EN361:2002 Personal protective equipment against falls from a height. Full body harnesses
- EN 341:2011 Personal fall protection equipment. Descender devices for rescue
